

**Motor vehicle having a screen wiper for its rear window and a supplementary rear stop light**

Patent Number: ☐ US5621942  
Publication date: 1997-04-22  
Inventor(s): EUSTACHE JEAN-PIERRE (FR); SCHITTER JACK (FR)  
Applicant(s): VALEO SYSTEMES ESSUYAGE (FR)  
Requested Patent: ☐ EP0652142, B1  
Application Number: US19940331689 19941031  
Priority Number(s): FR19930013127 19931104  
IPC Classification: B60S1/58 ; B60S1/06  
EC Classification: B60Q1/30A, B60S1/34, B60S1/58B  
Equivalents: DE69406244D, DE69406244T, ☐ FR2711955

---

**Abstract**

---

The rear part of a motor vehicle includes a rear window and a screen wiping apparatus for the rear window, comprising an electrical drive motor unit arranged inside the vehicle and having a drive shaft which projects out of the vehicle. The drive shaft extends through a bearing bush which is fitted in a hole formed through either the rear window or an adjacent portion of the vehicle body-work. A shouldered mounting bush is also fitted in this hole, around the bearing bush. The bearing bush has a threaded portion projecting externally, and the drive motor unit is secured to the vehicle by means of a nut which is tightened on this threaded portion. A rear light, typically a stop light arranged inside the vehicle so as to shine through the rear window, is secured on the screen wiping apparatus.
